PROFESSIONAL SUMMARY

Python Backend Developer with 3.5+ years of experience building scalable REST APIs and backend services using Python, Django, Django REST Framework, FastAPI, PostgreSQL, Redis, and Celery. Experienced in JWT authentication, role-based access control, asynchronous task processing, Razorpay payment and subscription workflows, webhooks, third-party API integrations, Swagger API documentation, and testing with pytest. Experienced in deploying applications on AWS EC2 with Gunicorn, Nginx, and Docker, and actively upskilling in RAG-based AI services with Azure OpenAI and ChromaDB.

TECHNICAL SKILLS

Languages & Backend	Python, Django, Django REST Framework (DRF), FastAPI, Backend Architecture
Databases & Caching	PostgreSQL, MySQL, SQLAlchemy/ORM, Redis, Query Optimization
Async Processing	Celery, Celery Beat, Background Jobs, Asynchronous Processing, Task Scheduling, Message Queues
API & Auth	REST API Design, Webhooks, OAuth2, JWT, Third-Party API Integration
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda, Route 53, CloudFormation, CloudWatch), Docker, Gunicorn, Nginx, Linux, CI/CD
AI & LLM	LLM Integration, RAG, Prompt Engineering, Vector Databases, Azure OpenAI
Tools & Practices	Git, GitHub, Bitbucket, Web Scraping, Selenium, Performance Optimization

WORK EXPERIENCE

Python Backend Developer | PySquad Informatics Ahmedabad, Gujarat **Feb 2023 – Present**

- Build and maintain production-grade REST APIs and scalable backend services using Python, Django, and Django REST Framework (DRF), with PostgreSQL for data modeling and JWT authentication, role-based access control (RBAC), and permission-based API access for multiple user roles.
- Deploy Django applications on AWS EC2 using Gunicorn and Nginx, with Docker containers where required.
- Run asynchronous background processing and scheduled jobs with Redis, Celery, and Celery Beat to handle long-running workflows and automated tasks.
- Integrate the Razorpay payment gateway with subscription management, payment verification, and webhook processing for reliable billing workflows.
- Develop third-party API integrations with WhatsApp, Slack, Discord, Telegram, CRM/ERP, and healthcare platforms to automate data exchange across systems.
- Develop AI-powered backend services using LangGraph, Azure OpenAI, and ChromaDB for RAG-based knowledge retrieval, conversational workflows, and LLM integrations.

Python/Django Developer | Agile Technology Ahmedabad, Gujarat **6 Months**

- Developed backend features in Python and Django, including REST APIs, database operations, business logic, and integration of frontend applications with backend services, using PostgreSQL, debugging, and Git-based workflows.

PROJECTS

NIVA – Agentic AI Chatbot Platform

Tech Stack: Python, Django, Django REST Framework (DRF), PostgreSQL, Redis, Celery, LangGraph, Azure OpenAI, ChromaDB

- Built scalable AI-powered backend services using Python, Django, DRF, LangGraph, Azure OpenAI, and ChromaDB, implementing RAG-based conversational workflows, knowledge-base retrieval, and AI response orchestration.
- Designed secure REST APIs with Django, DRF, and PostgreSQL, including JWT authentication and role-based access control (RBAC).
- Implemented subscription management, Razorpay payments, and webhooks, and built asynchronous workflows with Redis and Celery for automated background processing.
- Built an omnichannel integration layer connecting WhatsApp, Instagram, Slack, Telegram, Discord, Microsoft Teams, and LINE, along with CRM/ERP integrations including HubSpot, Salesforce/SAP, Odoo, Zendesk, and Freshdesk.

CareNav – Hospital Insurance Claims Platform

Tech Stack: Python, Django, DRF, PostgreSQL, Redis, Celery, AWS S3, pytest, Swagger

- Developed Django REST APIs for a multi-tenant hospital insurance claims platform where hospitals manage patients, invoices, pre-authorization, and final claims and insurers review and decide them, integrating NHCX, ABDM, WhatsApp, and insurer email, and documented the APIs with Swagger.
- Implemented JWT authentication with RBAC for hospital, billing, insurance, and admin users so each hospital only sees its own patients and claims, and designed PostgreSQL models for patients, policies, claims, and claim status history, with claim documents stored on AWS S3.
- Automated background processing with Redis and Celery, including claim submissions, insurer email sync, and scheduled payment checks, and wrote backend tests using pytest and Django TestCase.

ShareLyze – Document Sharing and Tracking

Tech Stack: Python, Django, DRF, PostgreSQL, Redis, Celery, Razorpay, AWS S3, Brevo

- Built email-OTP authentication, plan-based permissions, and Razorpay checkout with signature verification, activating free, standard, and advanced subscriptions only after a successful payment.
- Tracked share-link engagement (views, device, location, downloads, and clicks), enforced plan link-credit limits, and sent daily view summaries with a Celery Beat job on Redis.

Startlyze Price Tracker – E-Commerce Price Monitoring

Tech Stack: Python, FastAPI, Selenium, REST API

- Built a Python web scraping solution with Selenium to collect, monitor, and store product prices from South African e-commerce websites for real-time price tracking.
- Developed FastAPI REST endpoints that expose the stored pricing data for pricing analysis and insights.

EDUCATION

Bachelor of Computer Applications (BCA) *Aug 2018 – Apr 2022*

Smt. B.K. Mehta (IT Centre) BCA College

CERTIFICATIONS

- **Python Programming Certification** – IBM, Apr 2026
- **Django for Everybody Specialization** – University of Michigan, 2026
- **AWS Certified Cloud Practitioner (CLF-C02)** – AWS, 2026
- **Docker Foundations Professional Certificate** – Docker, 2026

LANGUAGES

• English • Hindi • Gujarati
